

CHECKLIST: IRRIGATION EQUIPMENT

Efficient fixtures for irrigation get water directly into the soil where it is truly needed, rather than spraying it where it will evaporate or miss its target!

- 1. When I turn on my drip or spray irrigation system, all of my emitters and spray heads are attached in good working order, with no breaks.**

YES

NO

If no, TAKE ACTION!

Replace all missing/broken emitters.

Date Completed: _____

- 2. When I turn on my drip and/or spray irrigation system, I have no lines that are leaking.**

YES

NO

If no, TAKE ACTION!

Replace all leaking lines.

Date Completed: _____

- 3. When I turn on my spray irrigation system, water is not sprayed onto unnecessary places such as sidewalks, driveways, and plants that do not need it.**

YES

NO

If no, TAKE ACTION!

Adjust spray heads to only water thirsty plants.

Date Completed: _____

THIRSTY FOR MORE? Tips on the back!

Visit: CityofSanRafael.org/Water for more irrigation fixture actions!

TIPS!

- ✓ Check with neighbors and friends to see if they have addressed these problems before and utilize their resources
- ✓ Check the Qualified Water Efficient Landscaper (QWEL.net) and Bay-Friendly California Landscaper Contractors Association (BayFriendlyCoalition.org) lists to find a qualified irrigation specialist

Also, make sure your sprinklers are watering plants – not driveways, sidewalks, or running off your property!
